FitLife Gym Membership Portal - Version 2

FEATURE_IMPLEMENTATION_REPORT

1. Feature 1: Popular Plan Badge

Implementation: Added a `<div class="badge">MOST POPULAR</div>` to the Premium Plan HTML.
Styling: Applied `position: relative;` to the existing `.plan` cards to safely anchor the new badge. Styled the badge with `position: absolute;`, `#ffc107` background, `#333333` text, 12px font, bold weight, 8px 12px padding, and a 4px border-radius.

2. Feature 2: Membership Benefits Section

Implementation: Inserted a `<ul class="benefits">` list directly between the pricing `<p>` tag and the `<button>` inside each plan.
Styling: Added CSS to remove list styles, align text to the left, and ensure readability with a 16px font size.

3. Feature 3: Testimonials Section

Implementation: Added a completely new `<section class="testimonials">` below the existing `.plans` section.
Content: Added the three required members (Rajesh Kumar, Priya Singh, Amit Patel) along with their respective quotes and star ratings.
Styling: Implemented a mobile-first CSS Grid layout (`.testimonial-grid`) for the container.

4. Feature 4: Mobile Responsiveness

Implementation: Added `@media` queries for `<600px` and `<767px` breakpoints.
Styling:

- Used `flex-direction: column;` on the `.plans` container to stack plans on mobile screens (<600px).
- Updated the `.testimonial-grid` to display 3 columns on desktop, 2 columns on tablet, and 1 column on mobile.
- Safely appended `min-height: 44px;` and `font-size: 16px;` to the existing `.plan button` CSS to meet the mobile touch target and readability requirements.
