TravelGo Holiday Packages Portal

Bug_Analysis_Report

1. Bug ID: BUG-001

Severity: High
Type: CSS / Layout
Description: The package section displays as a single column on all devices instead of utilizing a responsive grid.
Root Cause: The .packages class uses display: block; without any responsive breakpoints or CSS Grid applied.
Fix Applied: Implemented CSS Grid with @media queries to display 1 column on mobile (<768px), 2 columns on tablet (768px - 1023px), and 3 columns on desktop (≥1024px).
Line #: style.css - .packages class

2. Bug ID: BUG-002

Severity: High
Type: HTML / Content
Description: Only 2 packages (Paris, Switzerland) are displayed out of the required 9 packages.
Root Cause: The HTML was missing the markup for Bangkok, Bali, Dubai, Japan, Maldives, Iceland, and Greece.
Fix Applied: Added all 9 packages with their respective destination images, names, prices, and durations to match the business requirements.
Line #:index.html- <section class="packages">

3. Bug ID: BUG-003

Severity: High
Type: HTML & CSS / UI
Description: Featured badges and discounted price highlights (strikethrough original price, green new price) are missing from the relevant cards.
Root Cause: The original HTML and CSS lacked the necessary structure and classes to display badges and conditional pricing.
Fix Applied: Added a Featured to Paris, Bali, and Japan, and implemented .price-original (struck through) and .price-discount (green highlight) classes for Switzerland, Bali, and Maldives.
Line #:index.html- Inside .package divs & style.css

4. Bug ID: BUG-004

Severity: Medium
Type: CSS / Layout
Description: The hero banner does not span the full viewport height or utilize a background image or gradient as required.

Root Cause: The .banner class was hardcoded to a height of 150px with a solid #ddd background.
Fix Applied: Updated the banner CSS to use min-height: 60vh, width: 100%, background-size: cover, and added a background image.
Line #: style.css - .banner class

5. Bug ID: BUG-005

Severity: High
Type: HTML / Form
Description: The contact form only collects Name and Email, missing required business fields.
Root Cause: The <form> lacked the required destination dropdown menu and message text area elements.
Fix Applied: Added a <select> tag for destinations and a <textarea> tag for user messages.
Line #:index.html- <section class="contact">

6. Bug ID: BUG-006

Severity: Medium
Type: HTML & CSS / UI
Description: The footer is incomplete, missing Quick Links, Contact Info, Social Media, and Copyright sections.
Root Cause: The footer structure only contained a single TravelGo tag.
Fix Applied: Rebuilt the <footer> using a CSS Flexbox layout to distribute the 4 required sections evenly across the container.
Line #:index.html- <footer> & style.css - footer

7. Bug ID: BUG-007

Severity: Medium
Type: HTML / Accessibility
Description: All destination images lack the alt attribute, failing accessibility standards.
Root Cause: The <img> tags in the original markup only contained src attributes.
Fix Applied: Added descriptive alt text to every image tag (e.g., alt="Paris Tour") to meet accessibility criteria.
Line #:index.html- Inside .package divs

8. Bug ID: BUG-008

Severity: Low
Type: HTML / Content
Description: The call-to-action buttons inside the package cards use incorrect copy.
Root Cause: The original HTML hardcoded the text as <button>Book</button> instead of the required "Book Now".
Fix Applied: Updated the button text inside all package cards to explicitly state "Book Now".
Line #:index.html- Inside .package divs

9. Bug ID: BUG-009

Severity: Medium
Type: HTML / Formatting
Description: The prices displayed on the package cards lack currency symbols and proper number formatting.
Root Cause: The original HTML listed prices as raw unformatted numbers (e.g., 59999) rather than the requested localized format.
Fix Applied: Added the Rupee symbol (₹) and comma separators to all price values (e.g., ₹59,999) to match the provided data table.
Line #:index.html- Inside .package divs
