Dear Hiring Team,

I am writing to express my interest in the Data Science & Machine Learning Intern position at Bharat Academix. I am currently pursuing a B.Tech in Computer Science and Engineering at SRM Institute of Science and Technology, Tiruchirappalli, with a CGPA of 9.2/10. I am eager to apply my knowledge of machine learning, data analysis, and software development to contribute to your team.

Through my academic projects and research experience, I have gained hands-on exposure to data preprocessing, exploratory data analysis, machine learning model development, and performance evaluation. My recent work includes developing a CNN-based Motor Imagery EEG Classification system, building an Intrusion Detection System using the CICIDS2017 dataset, and creating a Farmer Market Price Prediction System using machine learning techniques. These projects strengthened my analytical thinking, problem-solving abilities, and practical understanding of data-driven solutions.

Additionally, I have completed training in AI/ML, cloud computing, and full-stack development through programs offered by GeeksforGeeks, AWS Academy, and EduSkill. I am proficient in Python, Java, C++, MySQL, and machine learning frameworks, and I am comfortable working with real-world datasets to extract insights and build predictive models.

I am particularly excited about this opportunity because it aligns with my passion for data science and artificial intelligence. I am eager to contribute to data collection, preprocessing, model development, experimentation, and data visualization while learning from experienced professionals. My strong work ethic, curiosity, and willingness to learn make me confident that I can add value to your team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills, projects, and enthusiasm can contribute to Bharat Academix. I look forward to hearing from you.

Sincerely,

Shrikaran P
B.Tech Computer Science and Engineering
