Educational Qualifications

B.Tech-Computer science engineering(5th semester) Sept 2023-May 2027
SRM Institute of science and Technology - Tiruchchirappalli
Current CGPA – 9.26

Higher Secondary (12th) - CS-Maths May 2023
Sri Vignesh Vidyalaya,Tiruchchirappalli
Total Percentage – 76%

Secondary Education(10th) May 2021
Sri Vignesh Vidyalaya,Tiruchchirappalli
Total Percentage – 87%

Professional Credentials & Experience

- ❖ Foundations of AI/ML – Geeks for Geeks
- ❖ AWS Academy Cloud Foundations - AWS
- ❖ Java Full Stack Development – EduSkill
- ❖ Get Started with JavaScript – Scaler
- ✧ Fullstack Development(Internship) –Innomatics Research Lab

Technical Skills

Languages:Java | Python | C | C++ | JavaScript | HTML | CSS
Libraries: Numpy | Pandas | Matplotlib | Scikit-Learn | Seaborn | Plotly | Tensorflow | Keras | OpenCV | Pytorch
Tools/Platforms: GitHub | GIT | VSCode | Google Colab | Canva
Databases: MySQL

Research & Publications

1. Shrikaran P, **Artificial Intelligence in Smart Agriculture**. Indian Journal of Natural Sciences, Oct 2024. {Link for Indian Journal of Natural Sciences} {PDF link for our Journal Page-918}
   - ● Authored a research paper on AI-driven solutions for precision agriculture, published in a peer-reviewed journal.
   - ● Developed machine learning models that improved yield prediction accuracy by 30%.
2. **A Secure On-Premises ETL Pipeline for Enterprise Data Warehousing(Id-ICCMC 349)**, Accepted for presentation at the 8th International Conference on Computing Methodologies and Communication (ICCMC 2025)

Technical Projects

Animal Recognition Using Deep Learning and MySQL Feb 2023– May 2024

- ◆ Developed an AI-based system that identified 100+ animal species with an accuracy of 85% using attributes like height, weight, color, habitat, and conservation status.
- ◆ Collaborated with zoology experts to curate and preprocess a dataset of 10,000+ records, enhancing model precision by 20% in species identification.

EEG CNN Architecture for Motor Imagery Classification May 2025 – July 2025

- ◆ Worked on developing and fine-tuning CNN models for EEG signal analysis and motor imagery classification

using PyTorch. Built preprocessing pipelines with bandpass filtering, STFT, and artifact removal to enhance signal quality.

- ◆ Conducted model training and evaluation on real-world EEG datasets, achieving improved classification accuracy. Contributed to drafting a research paper based on the project, demonstrating practical applications of ML in healthcare and BCI systems.
