Professional Summary

Computer Science Engineering student with knowledge of Python, SQL, DBMS, Data Structures, and Data Engineering concepts. Hands-on experience in ETL pipelines, data warehousing, OCR, local LLM integration, and machine learning through academic and research projects. IEEE-published researcher with strong problem-solving skills and experience in developing practical solutions using modern technologies.

Technical Skills

- **Languages**: Python, Java, C | Core: DSA, OOP
- **Backend & Web**: FastAPI, REST APIs, HTML, CSS
- **Databases & Cloud**: SQL, MySQL, AWS, Firebase
- **AI/ML**: Machine Learning, Deep Learning, PyTorch, Scikit-learn, CNN-LSTM
- **Tools**: Git, GitHub, Google Colab, Debugging
- **Soft Skills**: Problem Solving, Communication, Teamwork, Leadership, Time Management

Educational Qualifications

B.Tech in Computer Science Engineering(6th semester) May 2023 - May 2027
SRM Institute of Science and Technology - Tiruchchirappalli
CGPA - 9.3/10

Achievements

- **AWS Academy Cloud Foundations – AWS –** Learned fundamentals of cloud computing and data storage for scalable data processing
- **Oracle Cloud Infrastructure (OCI) AI Foundations Associate** – Earned Oracle certification demonstrating foundational knowledge of AI, Machine Learning, Generative AI, and Oracle Cloud services.
- **3rd Prize Winner (Cash Award)** – Ideathon, SRM Institute of Science and Technology, for developing a Centralized Dam Management System.
- **Participant** – 24-Hour Hackathon, Dhanalakshmi Srinivasan University, where I developed a Farmer Market Price Prediction System as part of a team.
- **Foundations of AI/ML – GeeksforGeeks -** Gained hands-on experience in data preprocessing, model building, and evaluation techniques

Research Internship(NIT Tiruchirappalli)

- Motor Imagery EEG Classification (BCI) — Worked with BCI Competition IV Dataset 2a and BCI Competition IV Dataset 2b EEG .gdf recordings for motor imagery analysis.
- Preprocessed raw EEG signals, selected motor cortex channels, and generated STFT-based time–frequency spectrogram representations.
- Developed CNN-based models for left/right hand motor imagery classification and subject-wise performance evaluation.

Projects

Secure On-Premises ETL Pipeline Using OCR & Local LLMs

Technologies: Python, OCR, LangChain, Local LLM, ETL, Data Warehousing

- Developed a secure on-premises ETL pipeline to extract and process enterprise documents using OCR and local LLMs, enabling automated data extraction while maintaining data privacy.

Smart Interconnected Dam Management System

Technologies: Python, IoT, Data Processing, Real-Time Monitoring

- Developed an interconnected dam monitoring system to collect and process operational data, enabling real-time monitoring and improved coordination between dam components.

Farmer Market Price Prediction System

Technologies: Python, Pandas, NumPy, Scikit-learn, Machine Learning

- Developed a machine learning model to predict crop market prices using historical mandi data and market factors providing insights to support informed selling decisions.
