Professional Summary

Computer Science Engineering student with a strong foundation in programming, data structures and algorithms, object-oriented programming, database management, and software development. Hands-on experience in full-stack development, artificial intelligence, machine learning, cloud computing, and research-driven projects. Adapt quickly to new technologies, collaborate effectively in team environments, and apply analytical problem-solving skills to develop practical and scalable solutions.

Technical Skills

- **Programming Languages**: Python, Java, C, C++
- **Core Concepts**: Data Structures & Algorithms, Object-Oriented Programming (OOP)
- **Web Development**: HTML, CSS
- **Databases & Cloud**: SQL, MySQL, Git, GitHub, Firebase, Google Colab
- **AI/ML**: Machine Learning, Deep Learning, PyTorch, Scikit-learn, CNN-LSTM
- **Soft Skills**:Team Collaboration , Quick Learner, Time Management , Leadership, Communication

Educational Qualifications

B.Tech in Computer Science Engineering (6th semester) May 2023 - May 2027
SRM Institute of Science and Technology - Tiruchchirappalli
CGPA - 9.3/10

Achievements

- 3rd Prize Winner (Cash Award) – Ideathon, SRM Institute of Science and Technology, for developing a Centralized Dam Management System.
- Participant in a 24-Hour Hackathon, Dhanalakshmi Srinivasan University, where I developed a Farmer Market Price Prediction System as part of a team.
- Foundations of AI/ML – GeeksforGeeks - Gained hands-on experience in data preprocessing, model building, and evaluation techniques
- Java Full Stack Development – EduSkill - Built web-based applications with structured data handling and backend integration

Research Internship (NIT Tiruchirappalli)

- Motor Imagery EEG Classification (BCI) — Worked with BCI Competition IV Dataset 2a and BCI Competition IV Dataset 2b EEG .gdf recordings for motor imagery analysis.
- Preprocessed raw EEG signals, selected motor cortex channels, and generated STFT-based time–frequency spectrogram representations.
- Developed CNN-based models for left/right hand motor imagery classification and subject-wise performance evaluation.

Projects

- **Smart Interconnected Water Dam Alert System** — coordinated multi-dam monitoring with GSM/Wi-Fi, predictive flood control, and centralized supervision.
- **Smart Academic Timetable Generator** — automated timetable scheduling system that generates conflict-free academic timetables by allocating subjects, faculty, classrooms, and time slots while satisfying institutional constraints and reducing manual scheduling effort.
- **Farmer Market Price Prediction System** — machine learning–based prediction of crop market prices using historical mandi data, seasonal trends, weather conditions, and demand–supply analysis to help farmers decide the best time and market to sell produce.
